

Alino TL

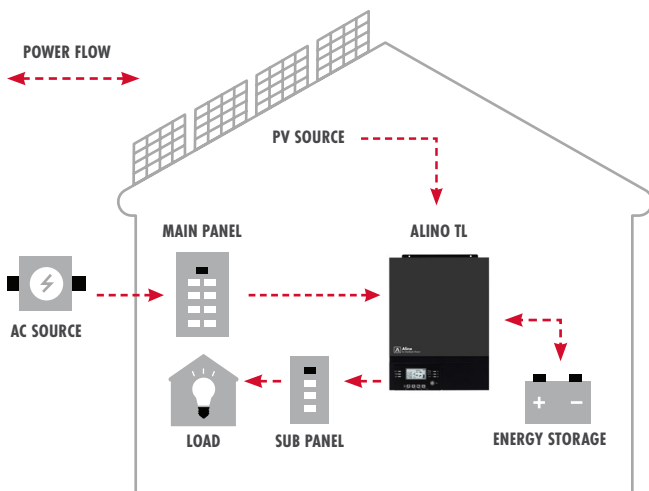

Solar Power Conditioning Unit

- Available as ATL3024E (24VDC 3000W) and ATL5048E (48VDC 5000W), 50/60Hz
- Built-in 80A, 450VDC solar charge controller; can drive AC loads off of PV array
- Max PV array 5000W at 48V and 3000W at 24V
- A detachable LCD display provides comprehensive monitoring using OPTICS RE
- Rugged (-10 to 50°C), proven design with twin replaceable fans
- Battery optional design provides daytime PV driven loads
- Full programmable battery charger for lead-acid and lithium-ion batteries
- CE Mark, certified to IEC62109-1,-2

The Alino TL is a compact, lightweight off-grid inverter that is ideal for rugged installations that require OutBack Power reliability.

The Alino TL by Outback Power offers a complete inverter and a solar charge controller in one attractive, compact package. This inverter is certified to IEC62109-1 and -2 and carries the CE mark. The Alino TL family can work with a wide variety of batteries from flooded lead-acid batteries to sealed VRLA (AGM and Gel) as well as lithium-ion batteries. The Alino TL has the ability to start with a small battery bank and add batteries later, flexibility that is valued in international markets. The Alino TL can also be used as a backup power source in applications where no solar panels are available. The Alino TL comes with numerous modes that can help the user optimize its use for the market. A 24-hour timer helps to switch the modes. The Alino TL is capable of being monitored by Outback Power's well-known cloud-based OPTICS RE monitoring system, accessible on any internet-enabled device.
